

PREFACE

The American Language Course (ALC) is designed primarily for an intensive language training program. However, these materials can also be used in nonintensive programs. The course will provide students with a sufficient level of fluency and communicative proficiency in American English to enable them to successfully pursue technical or professional training in schools conducted by the Department of Defense.

The General English Phase of the ALC consists of six progressive levels of language proficiency training. Levels I through V consist of six separate instructional packages each. Level VI contains four.

Level I	Books 1 - 6
Level II	Books 7 - 12
Level III	Books 13 - 18
Level IV	Books 19 - 24
Level V	Books 25 - 30
Level VI	Books 31 - 34

The coordinated instructional packages for Books 1-30 consist of the following:

1. Instructor Text
2. Student Text
3. Audiotapes
4. Instructor Language Laboratory Activities Booklet
5. Student Language Laboratory Activities Booklet
6. Quiz Kits

NOTES TO THE STUDENT

This booklet contains the Language Laboratory Activities (LLA) for Book 13.

You will need a pen or pencil and this booklet to do the activities correctly. All directions are given orally on the tapes. It is important to listen carefully to the instructions and to do the things the tape tells you to do. You will be told to repeat words or sentences and to ask and answer questions. You will also be told to choose and mark certain words or expressions, or to write special words, phrases, or sentences. Most of the time the tape will give you the correct answers right away, so you can check your work. Sometimes the tape will tell you to look on a certain page for the answers. Relax, listen carefully, and respond!

In most countries, people use meters, centimeters, and millimeters to talk about size. In the U.S. people usually describe size in inches, feet, and yards.

We also use these six words to talk about a short distance between one thing and another. To describe longer distances, people in most countries use kilometers. People in the U.S. use miles when they talk about how far it is from one place to another.
